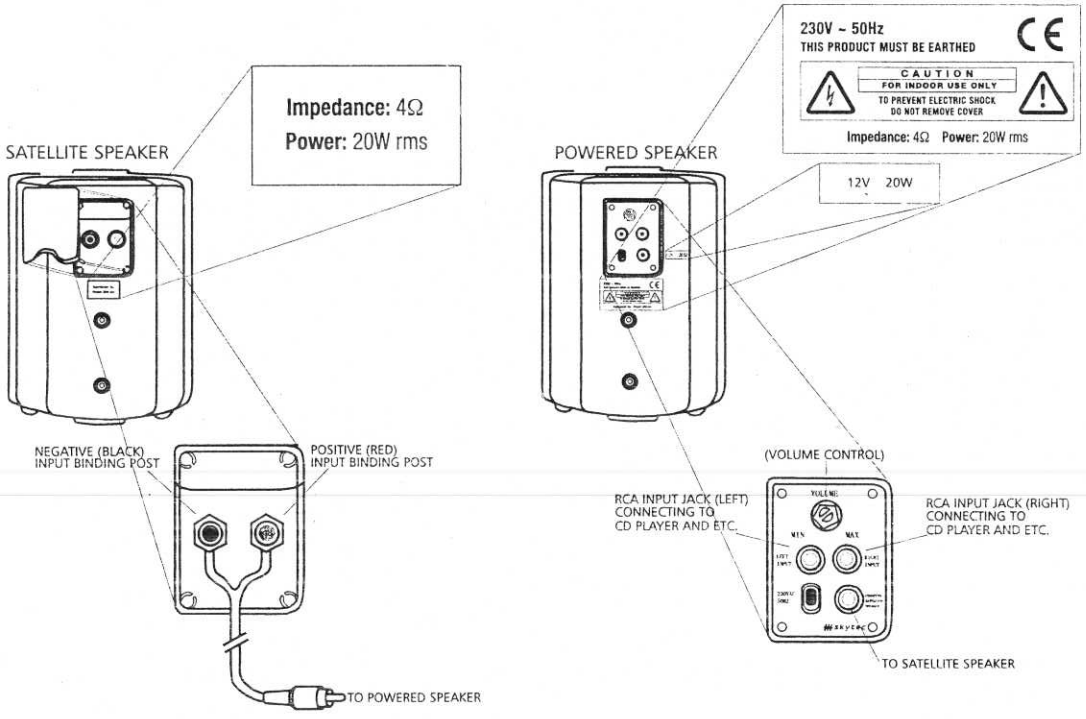
CONNECTING YOUR SPEAKERS:

The gold-plated binding posts on our speakers are color-coded for polarity; red is positive and black is negative. The binding posts are designed to accept either bare wire or "Banana Plugs." Turn off the amplifier prior to making connections to avoid possible damage from accidental speaker wire shorting. Make sure that all connections are tight and there is no shorting of wires from one terminal to another. Check that the polarity is correct on both speakers otherwise bass response and imaging will suffer from cancellation.



Impedance: 4Ω
Power: 20W rms
SATELLITE SPEAKER
NEGATIVE (BLACK) INPUT BINDING POST
POSITIVE (RED) INPUT BINDING POST
TO POWERED SPEAKER
230V ~ 50Hz
THIS PRODUCT MUST BE EARTHED

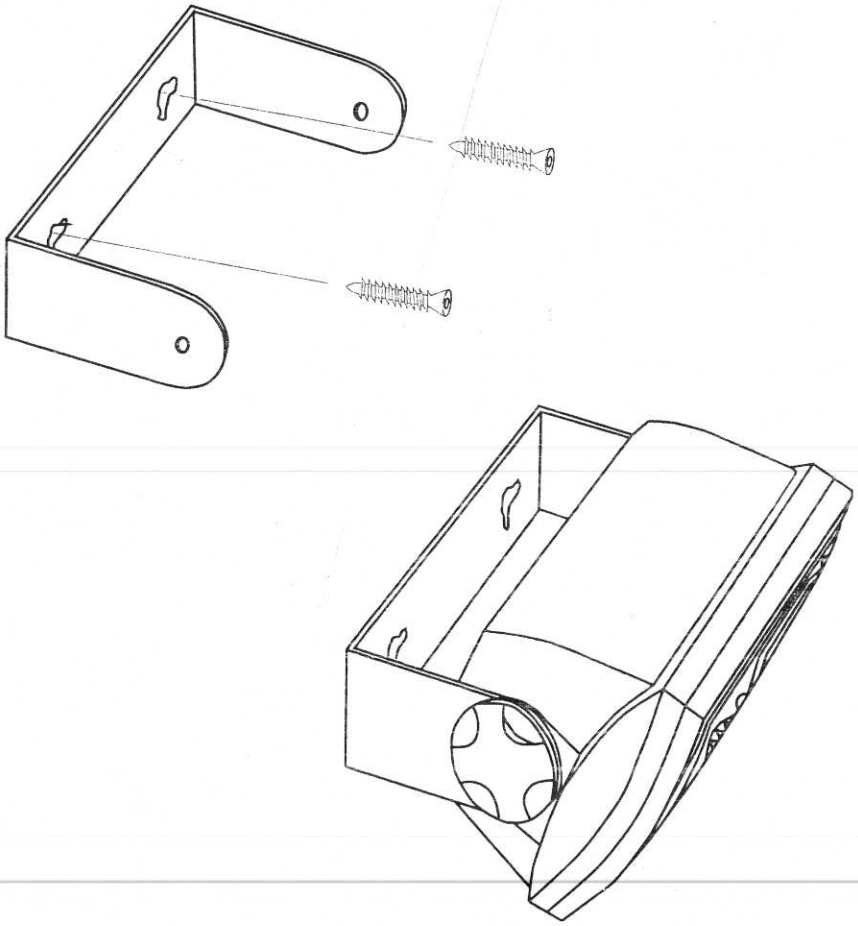
RCA INPUT JACK (LEFT) CONNECTING TO CD PLAYER AND ETC.
RCA INPUT JACK (RIGHT) CONNECTING TO CD PLAYER AND ETC.
TO SATELLITE SPEAKER

MOUNTING

The speakers are equipped with mounting brackets that will allow either vertical or horizontal mounting. The brackets should be mounted using a level to assure correct positioning. Always make sure that the mounting surface and fasteners will support the speaker safely. Connect the speaker wiring to the speaker, assuring correct polarity. Secure the speaker to the bracket using the supplied knobs. Adjust the speaker for optimum sound. Hand-tighten the knobs only! Use of power tools can cause damage to the threaded inserts, causing them to break free of the cabinet.
The powered speaker weight:3.74 KGS
The satellite speaker weight:1.97 KGS



Thank you for purchasing a SKYTEC speaker system. It is a state-of-the-art product carefully designed manufactured for Professional use, and has been thoroughly tested to ensure consistent and reliable performance.
